

RAJESHWAR SEHDEV

Senior AI/ML Engineer | Generative AI | Full-Stack AI Solutions | LLMs & Cloud Deployments

India | rajeshwarsehdev@gmail.com | [LinkedIn](#)

SUMMARY

Senior Applied AI Engineer with 9+ years across industry. Lead end-to-end GenAI systems spanning multi-agent system, retrieval, agent/tool orchestration, guardrails, evaluation, and deployment. Translate new capabilities into reference-grade blueprint, and product feedback. Strong delivery in agentic multimodal RAG, Guardrails, and evaluation.

SKILLS

- **Programming & Data Science:** Python, PyTorch, Transformers, Pandas, Numpy, Scikit-learn
- **ML & LLM Technologies:** Agentic Workflows, LangGraph/LangChain
- **Cloud Platforms & LLM APIs:** AWS (SageMaker, Lambda, EKS, S3, API Gateway, Docker), OpenAI
- **Database Systems:** PostgreSQL
- **Application Development:** FastAPI, Streamlit, API design & integration
- **Cloud & MLOps:** AWS (SageMaker, Lambda, EKS, S3, API Gateway), Docker

WORK EXPERIENCE

Senior Data Scientist | Gartner | Gurgaon, India | Sep 2024 – Present

- Architected and shipped **AI Research Assistant Tool**, a production multi-agent research automation system using LangGraph and GPT-4o, GPT-5, replacing hours of manual research with on-demand agentic workflows.
- Built a hybrid retrieval pipeline combining **vector and lexical search on OpenSearch** (BM25 + RRF re-ranking) with Tavily web search, routing queries intelligently across internal knowledge bases and live web sources; improved research insight accuracy.
- Engineered a **multi-tier LLM orchestration layer** with intent classification, clarification nodes, and confidence-gated routing to reduce hallucinations and ensure grounded, source-cited responses at enterprise scale.
- Built an LLM validation & evaluation pipeline using reference answers to score correctness, consistency, business-rule alignment, and data-security compliance.
- Collaborated with international consulting teams to deliver enterprise AI deployments on AWS SageMaker and Kubernetes, ensuring reliability and scalability.
- Engineered custom LLM agents and API wrappers for knowledge workflows, integrating structured DB prompts to enhance global research capabilities.

Senior Data Scientist | Iris Software (BFSI Domain) | Noida, India | Apr 2023 – Sep 2024

- Delivered a Generative AI Table QnA system using LangChain & LLaMA, reducing manual reporting time by 40% and enabling self-service analytics for business teams.
- Designed and deployed Retrieval-Augmented Generation (RAG) pipelines, improving query accuracy by 25% and accelerating financial insights for executives.
- Conducted statistical analysis and anomaly detection on BFSI datasets, strengthening fraud detection processes and improving compliance efficiency by 20%.
- Built and deployed FastAPIs and dashboards serving 100+ daily users, improving accessibility of financial data.
- Developed document quality and classification APIs using CNNs, OpenCV, and BERT transformers, reducing data processing errors by 35% and improving workflow reliability.
- Applied prompt engineering and generative AI techniques to optimize query performance, showcasing practical impact of LLM adoption in BFSI.

- Collaborated with cross-functional BFSI stakeholders to align AI delivery with regulatory, risk, and operational requirements.

Senior Data Scientist | Gramener | Remote | Aug 2021 – Apr 2023

- Delivered AI/ML solutions for pharma and tourism clients, applying NLP (topic modeling, sentiment analysis) and prompt engineering to enhance contextual analysis, improving marketing campaign targeting accuracy by 18%.
- Designed and deployed data visualization dashboards and APIs that accelerated access to insights and streamlined strategic decision-making for global stakeholders.
- Implemented Generative AI techniques to automate reporting workflows and enrich data-driven recommendations.
- Partnered with international consulting clients, ensuring alignment of AI initiatives with business goals and agile project delivery.
- Enabled faster turnaround for strategy teams by optimizing ML workflows, reducing manual analysis efforts.

Data Scientist | Tata Consultancy Services (BFSI & Manufacturing) | Gurgaon, India | Sep 2016 – Aug 2021

- Built and deployed ML-based incident classification and routing models, reducing ticket misclassification by 40% and improving support team efficiency.
- Automated ticket categorization with NLP, cutting manual effort by 60% and reducing turnaround times for BFSI clients.
- Developed automation workflows using Automation Anywhere, saving 500+ man-hours annually across operations.
- Conducted EDA, feature engineering, and NLP on enterprise datasets, uncovering trends that improved risk management and compliance.
- Collaborated with IT, support, and business teams to integrate ML workflows into enterprise systems, improving operational efficiency and cost-effectiveness.

CERTIFICATIONS & TRAINING

AWS Machine Learning Specialty Certification | 2025
Applied AI & Machine Learning Course

EDUCATION

Bachelor of Computer Applications | Guru Gobind Singh Indraprastha University | Delhi, India | 2016

PERSONAL PROFILE

- Nationality: Indian
- Availability: Immediate
- Languages: English, Hindi.
